The Calibre One Index provides a comprehensive review of early stage tech investment. It lists and compares all the investments made by tech investors in the key territories of Europe and North America on a quarterly basis.

Published in London and San Francisco every January, April, July and October, the Calibre One Index is compiled by Calibre One – the world's leading technology specialist executive search consultancy.

The Index is downloadable in PDF format from www.calibreone.com.

Total tech investment 2004 – 2005

Comments

From the USA

"The US tech investment market now feels very robust and it was pleasing to see this reflected in the figures for Q2.

2005 has seen a definite increase in M&A activity. The much vaunted market consolidation seems to be gaining pace and has bolstered the confidence of already confident VCs in the US.

In terms of our activity, the demand for CEOs remains strong and we continue to work for a number of UK clients looking to hire US Executive talent, in particular CEOs, to drive their businesses forward. It is also interesting to note that there is certainly a far greater demand for VP International Sales than there has been in the last 4 years. There is also a real increase in focus on the Asia/Pac region: we have completed a number of VP Asia/Pac searches for VC-backed technology businesses in recent months. Several more are ready to be launched.

It was interesting to see the figures for Canada where investment in Q2 appears not so much to have declined, as to have fallen off a cliff. The figures have been checked and rechecked. We hope that this is an aberration and that Q3 will see a recovery to normal levels of activity."

Tom Barnes
*President,
Calibre One USA*

From Europe

"This has been an interesting quarter. Looking across the whole of Europe, investment activity was slightly depressed with the number of investments down from 123 in Q1 to 113 in Q2. The amount of capital invested was reduced even more sharply by about 20% from \$688m to \$562m. Interestingly, investment activity held up reasonably well in the UK and Northern Europe, whereas most other European markets had a substantial drop in activity - most notably France, where investment activity dropped by over 50%. Previously, investment activity in France had seemed to be on a positive trajectory, albeit with a habit of alternating between good and bad quarters. Whether this is just another blip - possibly as a result of uncertainty surrounding the referendum on the European constitution - or a trend is uncertain. The Index for Q3 will make interesting reading.

Our business remains strong. There have been rising levels of activity across all functional areas, but there has been a definite increase in demand for CEOs, especially by earlier stage businesses. This is very much a sign of renewed confidence as the Boards of these companies look to drive their businesses forward to take advantage of the continuing improvement in the IT market. It is clear that Europe, and the UK in particular, is home to many businesses that aim to have world-beating potential.

The US market, happily, appears to be very much on a positive trajectory with levels of investment reaching those at the beginning of 2004. This is a welcome sign for, in our business, the fortunes of our UK and US offices are very much intertwined."

James Brocket

Setting the standard

With offices in London and San Francisco, Calibre One is the world's leading executive search organisation dedicated to working with high-growth technology businesses and their investors to find outstanding talent to help them realise their true value.

Our 'no stone left unturned' approach to each assignment produces results that consistently surpass our competitors. This has enabled us to build partnerships with the world's leading private equity investors and their portfolio companies across the world.

Executive search

Never before has the effective and efficient recruitment of senior managers been more of a mission critical undertaking. A successful technology company is built on three core pillars of value – the technology (IP), the balance sheet and the quality of the team.

We help our partners to achieve their business objectives through managing the effective recruitment and retention of great people on their behalf.

We measure our success in client terms, not our own. Completing an assignment is only the start. The real measure of success of any Executive placement is the improved performance of the business. With this in mind, Calibre One provides the most comprehensive guarantee in the market. Should we recruit a candidate who does not work out in their first year, for whatever reason, then we will undertake to manage the assignment again for no additional fee.

In this way our success is inextricably linked to the success of our clients.

Interim management

Calibre One Interim is a leading Interim Management provider. It manages a hand-picked network of highly skilled and experienced executives all of whom have been subjected to a rigorous assessment and referencing process before being accepted onto the register.

Whether it's a spin-out, strategic review, special project, aggressive expansion or a turnaround, Calibre One Interim can be trusted to deliver outstanding interim management solutions in record time.
