The Calibre One Index provides a comprehensive review of early stage tech investment. It lists and compares all the investments made by tech investors in the key territories of Europe and North America on a quarterly basis.

Published in London and San Francisco every January, April, July and October, the Calibre One Index is compiled by Calibre One – the world's leading technology specialist executive search consultancy.

The Index is downloadable in PDF format from www.calibreone.com.

Total tech investment Q4 2004 – Q3 2005

Comments

From the USA

"The US market has been in full-swing for sometime and the tech-investment scene feels like it is on very firm ground. Q3 was another strong quarter, and although slightly less was invested in the US than in Q2 the longer term trend is stable. More striking was the fact that our sources indicate that not one single tech investment was made in Canada in Q3, following on a remarkably soft Q2. If anyone knows different – please let us know. The tech investment trend in Canada has been down for some time – now it can drop no further. This is remarkable when you consider that around a year ago the Canadian market was tracking along at around the same rate as the French market. It will be interesting to see if there is some sort of recovery.

California-based companies continue to take in 40% of the total US tech investment. A full two thirds of all tech investment nationally is accounted for by Companies based in five states (California, Massachusetts, New York, Texas and Washington) and this is reflected in the pattern of our own client base and business."

Tom Barnes
*President,
Calibre One USA*

From Europe

"Q3 2005 really provides firm evidence that the tech investment market in Europe is in full recovery. Whilst the number of investments made in Europe this quarter remained pretty consistent, the total capital invested grew to \$773M. For the preceding 4 quarters the average amount invested was \$604M. This growth of near 30% is proof positive of what has been evident for some time. Whilst there is a relative lack of quality investment opportunities in the technology sector in Europe, those that do exist are able to close 'meaningful' VC rounds getting towards the \$10M mark. This has been the norm in the US for years and it is great to see European firms getting the backing they deserve in order that they can focus their efforts more on creating value than worrying about their short runway.

The UK in particular had a strong performance with \$361M invested – up c.70% compared to the preceding annual average. The improvement in activity has fed an increase in confidence in the community and, pleasingly, a marked increase in Executive Search activity. It is clear that the European early-stage tech scene is healthier than it has been for some time – possibly than it ever has been. For us this has led to more robust and ambitious clients who are keen to seek the best person possible rather than the best they can afford – we are doing far more searches across borders, especially in the US, as a result."

James Brocket

Setting the standard

With offices in London and San Francisco, Calibre One is the world's leading executive search organisation dedicated to working with high-growth technology businesses and their investors to find outstanding talent to help them realise their true value.

Our 'no stone left unturned' approach to each assignment produces results that consistently surpass our competitors. This has enabled us to build partnerships with the world's leading private equity investors and their portfolio companies across the world.

Executive search

Never before has the effective and efficient recruitment of senior managers been more of a mission critical undertaking. A successful technology company is built on three core pillars of value – the technology (IP), the balance sheet and the quality of the team.

We help our partners to achieve their business objectives through managing the effective recruitment and retention of great people on their behalf.

We measure our success in client terms, not our own. Completing an assignment is only the start. The real measure of success of any Executive placement is the improved performance of the business. With this in mind, Calibre One provides the most comprehensive guarantee in the market. Should we recruit a candidate who does not work out in their first six months, for whatever reason, then we will undertake to manage the assignment again for no additional fee.

In this way our success is inextricably linked to the success of our clients.

Interim Management

Calibre One Interim is a leading Interim Management provider. It manages a hand-picked network of highly skilled and experienced executives all of whom have been subjected to a rigorous assessment and referencing process before being accepted onto the register.

Whether it's a spin-out, strategic review, special project, aggressive expansion or a turnaround, Calibre One Interim can be trusted to deliver outstanding Interim Management solutions in record time.
